

Allscripts Privacy & Security Risk Assessment™

Powered by Symantec

First-of-its-Kind Solution Offers Peace of Mind

In the digital era, keeping patient and medical records secure can be a costly challenge. With Allscripts Privacy & Security Risk Assessment Powered by Symantec, you'll find peace of mind.

Available exclusively from Allscripts and built by Symantec – a global leader in securing the world's information – this web-hosted application is the first of its kind. What's more, it evaluates privacy and security risks with one-step ease. Detailed, immediate reports are generated upon completion.

Helps Overcome Barriers to HIPAA Security Requirements

This custom-designed solution helps you qualify for federal incentives for Electronic Health Record (EHR) adoption under the American Recovery and Reinvestment Act (ARRA).

Gap analysis and personalized recommendations for bringing your practice into compliance with HIPAA streamline processes and help you avoid expensive fees. A breach of security and privacy regulations can result in fines of up to \$1.5 million, as well as a public announcement of the breach by the Centers for Medicare & Medicaid Services (CMS).

Simple, Comprehensive & Easy to Use

Let Allscripts make the hard work easier. With the Privacy & Security Risk Assessment, you can analyze administrative, technical and physical safeguards as defined by HIPAA in one place.

No downloading or new hardware is necessary. Only a basic understanding of the HIPAA/HITECH Act is needed to complete an assessment.

Online help, a guided tour and tips point you in the right direction. Graphic representations of assessment results make it simple to spot and solve key issues.

The Privacy & Security Risk Assessment can be purchased with an annual or multi-year subscription. To put it to work for you, talk to your Allscripts Client Executive today.

About Symantec: Symantec is a global leader in providing security, storage and systems management solutions to help consumers and organizations secure and manage their information-driven world. Symantec's software and services protect against more risks at more points, more completely and efficiently, enabling confidence wherever information is used or stored.

Industry Needs:

- An expert tool to support risk assessments required by HIPAA
- A safe, affordable solution to reduce the risks of a security breach
- A complete snapshot of privacy and security risks

Key Benefits:

- Single stop for measuring administrative, technical and physical safeguards outlined by HIPAA
- Limited HIPAA/HITECH Act knowledge necessary
- Meets single and multiple provider and location requirements
- Annual assessment data collection and verification
- Automatic assessment and audit log
- View results by each physical location or by entire practice
- Accessible via any web browser
