

BE2012 with all but SP1 hotfixes applied

So, here I have a media set with the OPP set to 12 hours and the APP set to 1 day

Name	Location	Media Set	Overwrite Protection Period	Append Period	Capacity	Compression...	Vaulting status ▲
LTO000001	Robotic library 0001	Daily	Overwriteable	13/06/2012 2:18:26 p.m.	745 GB free	1.0:1	

I have a backup job that runs daily and only 1 tape in the media set.

So effectively I am reusing the same tape each day, well I would like to but Backup Exec won't let me!

So I though "Ah the APP is longer than the OPP, I will make them the same"

Name	Location	Media Set	Overwrite Protection Period	Append Period	Capacity	Compression...	Vaulting status ▲
LTO000001	Robotic library 0001	Daily	Overwriteable	Not appendable	745 GB free	1.0:1	

Nope! Still get an "insert media" alert

 **Alert: Library Insert**

 **Media Information**

Server: **AK1PSVRPNAS04**

Storage: **Robotic library 0001**

Job Name: **ak1psvrpvc01 Daily-Full**

Date and Time: **13/06/2012 10:32:19 a.m.**

Message: Please insert overwritable media into the robotic library using the import command.

Overwritable media includes scratch, blank, and recyclable media. Please note that depending on the current Media Overwrite Protection setting, imported and allocated media may be overwritable as well. Consult the online help for more information on overwritable media.
