One of the greatest challenges companies face is storing and managing unstructured content. Symantec Enterprise Vault™ helps companies worldwide to better leverage this powerful information for a competitive edge.

At Vault Solutions, we're committed to taking the power of Symantec one step further. Our Archive Accelerator Export module provides fast and robust mass data export from Enterprise Vault archives – all managed via a simple management console interface. Graphs outlining both export and failure rates per hour/minute help boost efficiency. The solution is scalable to support export of billions of items, while automated scheduling ensures no impact to productivity.
